DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No.

09/738,007, filed on 12/15/2000. ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over CA 1,285,110 ('110) in view of Sakuma et al (USP 4,691,718) and Suyama (USP 4,944,296). '110 discloses an electronic toothbrush comprising a brush head portion (1) having a bristle portion (1a), holder portion (2), n-type semiconductor (4) (page 10, line 11) as well as a battery (5) (page 10, lines 25-26) electrically connected to the n-type semiconductor. '110 discloses the invention substantially as claimed with the exception of the solar battery and the number of Volts. These "electronic" toothbrushes have been known to be used with batteries of 1.5 Volts (column 3, lines 40-41 of Sakuma et al) as well as either dry or solar batteries (column 1, lines 18-19 of Suyama). Given that '110 discloses the main idea of connected the n-type semiconductor (4) to a battery (5), the use of well known batteries already recognized as useful in these types of brushes would be obvious to one of ordinary skill.
